

AGENDA

Incident Response Webinar

Wednesday, November 11, 2026 10:00 AM – 4:55 PM ET

Schedule at a Glance

TIME (ET)	SESSION	SPEAKER
10:00 – 10:45 AM	1 · The 2026 Threat Landscape	Seth Loe
10:45 – 11:30 AM	2 · Anatomy of a Response	Aidan Brown
11:30 – 11:40 AM	Break	
11:40 AM – 12:25 PM	3 · Detection & Analysis	Aidan Brown
12:25 – 1:10 PM	4 · Eradication & Recovery	Cody Kretsinger
1:10 – 2:15 PM	Lunch break	
2:15 – 3:00 PM	5 · Leading Through an Incident	Max Kurek
3:00 – 3:45 PM	6 · Inside the Quarantine	Collin Page
3:45 – 3:55 PM	Break	
3:55 – 4:40 PM	7 · Playbooks & Tabletops	Cody Kretsinger
4:40 – 4:55 PM	8 · Open Panel	Full Panel

The Sessions

SESSION 1 · 10:00 AM ET

The 2026 Threat Landscape: What's Changed, and What It Means

Seth Loe, President and Chief Security Officer

The threat environment has changed enough in the past year that IR programs built on older assumptions are working with an incomplete picture. Seth opens the day by mapping what attackers are doing now, where they're getting in, and what that means for how the sessions that follow should be applied.

SESSION 2 · 10:45 AM ET

Anatomy of a Response: First Alert to Final Report

Aidan Brown, Security Analyst

Aidan covers the IR lifecycle from beginning to end, what each phase involves, and what separates a structured response from one that improvises under pressure. This session establishes the shared framework the rest of the day builds from.

SESSION 3 · 11:40 AM ET**Detection & Analysis:
Reading an Incident in Motion**

Aidan Brown, Security Analyst

Detection without analysis is just noise. Aidan covers how to move from an initial alert to a clear picture of what happened and what the right next step is, with a focus on making sound decisions when information is still incomplete.

SESSION 4 · 12:25 PM ET**Eradication & Recovery: Removing the
Threat and Restoring Operations Safely**

Cody Kretsinger, Director of Security Research

Getting back online is only part of the job. Cody covers how to eradicate a threat thoroughly before recovery begins, what clean means in practice, and how to validate it so operations restore without reopening the same exposure that started the incident.

SESSION 5 · 2:15 PM ET**Leading Through an Incident:
Decisions, Disclosure, and the Message**

Max Kurek, VP of Marketing

Incident response has a business and communication dimension that runs parallel to the technical one. Max covers how to make the case for preparedness, what stakeholder communication looks like during an active incident, and how leadership decisions shape outcomes before the first alert fires.

SESSION 6 · 3:00 PM ET**Inside the Quarantine: Working
a Compromised Machine Live**

Collin Page, CISSP, Security Advisor

Collin walks through a practical application of the IR lifecycle on an infected machine quarantined from a network by an EDR solution, covering the real decisions and competing priorities that come up when the framework meets an actual incident.

SESSION 7 · 3:55 PM ET**Playbooks & Tabletops: Break
Your Plan Before an Attacker Does**

Cody Kretsinger, Director of Security Research

Cody covers how to build playbooks that hold up under real conditions and how tabletop exercises surface the gaps before an actual incident does.

SESSION 8 · 4:40 PM ET**Open Panel: Bring Your Hardest Questions**

Full Panel

The full session roster comes together to close the day with open Q&A and a clear path for applying the IR framework to your own environment and client relationships.
